Relevant Experience

Pratham Software (PSI)

Senior User Experience Designer Oct 2021 — Present

User Experience Lead Oct 2016 — Present

Senior Software Engineer Aug 2014 — Sep 2016

- Lead a team of three designers, help hire, train and mentor juniors, and introduced a shared design system for internal products.
- Replaced design approvals run over phone, WhatsApp and email with one portal for a UK apparel supplier's designers, account managers and retail buyers: led the research (about 10 interviews across five roles) and designed every screen and its spec in about 3 months; now used by thousands, lifting client-reported productivity 300%+ in 6 months.
- Built the client's design system from scratch: tokens, 21 components and written specs, all meeting WCAG AA.
- Designed Voice to Brief, an AI feature that turns a spoken call into a structured brief, including 37 designed failure states.
- Sole designer on a greenfield waste-management platform for a US software provider (Jun–Nov 2023), from SME sessions to developer handoff; turned a 50+ field setup sheet into a four-step wizard, earning Pratham's Customer Delight Award.
- Built the platform's Figma component library, cutting design, update and fix time from hundreds of hours to a couple of hours.
- Audited a live web app against WCAG 2.1: 10 of 18 checks failed, including text contrast as low as 1.16:1 and invisible keyboard focus, each with an owner and a fix.
- Since 2023, driving the design system for a US provider of CAD and business-process software for the packaging industry: stakeholder research, wireframes and prototypes, user testing, and accessible, responsive B2B interfaces.
- 2022–2023: created a design system that brought several apps under one design language for a UK digital fashion and supply-chain software provider, with guidelines, components and patterns for developers.
- 2019–2020: designed enterprise tools for US clients: a programme and KPI tracker for a global consulting firm's transformation work, and equipment, work-order and test scheduling for a lab-management software provider.

Skills

Research and design

User interviews and SME workshops, Usability testing, Information architecture, Interaction design, Design systems and tokens, Prototyping, Developer handoff, WCAG 2.2 AA

Tools

Figma, FigJam, Miro, Jira, Confluence, Photoshop, Illustrator, Sketch, Adobe XD, InVision, UXpin, Zeplin

AI and code

AI-assisted prototyping (Claude, Lovable), HTML and CSS

Selected Work

Design approvals portal

Research to design system for a UK apparel supplier's approval workflow; 300%+ productivity in 6 months.

Waste management platform

Greenfield platform for a US software provider; a 50+ field setup turned into a four-step wizard.

Accessibility audit

WCAG 2.1 audit of a live web app: 10 of 18 checks failed, each with an owner and a fix.

Education funds platform

Four-role platform for a US state programme bid.

- 2017–2018: led research-based UX for mobile apps in Australia, the US and India (stress management, cricket scoring, hotel booking): interviews, personas, storyboards and several rounds of user testing from low-fi to hi-fi.
- 2014–2016: designed and built front ends in HTML, CSS and JavaScript, including rich-media ads for a US digital-advertising platform that ran on MSN, Yahoo and AOL.

Media Designer · **Enhance Systems Pvt. Ltd.** Mar 2012 — Jul 2014

E-learning modules, simulations, animation and presentation design

Education

Sikkim Manipal University
BCA (Bachelor of Computer Applications), 2011

Animation & Web Design, Arena Animation, Delhi

UX design courses, Interaction Design Foundation

Interests

Playing cricket, badminton, table tennis and pickleball, and watching sports.
